

# Documentation:Travelia Pro WordPress Theme

Install **Travelia Pro** WordPress Theme within a few minutes.

**Travelia Pro** is a Travel and tour WordPress Theme It's fully responsive with bootstrap framework, easy to customization, modern and creative template. Its perfect for Travel & Tour, Business, Corporate, Agency, Studio, Startup or any other Business websites. **Travelia Pro** comes with Quality Design & Standard Coding via HTML5 and CSS3. Travelia Pro includes Multi Page Layout. This WordPress Theme has commented code for each section, included in the main file, so that you can easily adapt and suit for your needs.

## Required plugins:-

1. WP Travel Engine(<https://wordpress.org/plugins/wp-travel-engine/>)
2. Contact Form 7(<https://wordpress.org/plugins/contact-form-7/>)
3. Newsletter Plugins(<https://wordpress.org/plugins/newsletter/>)
4. One Click Demo Import  
(<https://wordpress.org/plugins/one-click-demo-import/>)

# Travelia Pro documentation: How to start?

This documentation will show you step by step how to complete the basic configuration of **Travelia Pro**. It is important that you follow these steps carefully because some steps build up on each other and that will help you a great deal to set up your website properly:

1. [How to set up a static front page in WordPress?](#)
2. [How to upload, install and activate Travelia Pro?](#)
3. [What is page and how to create it?](#)
4. [What is category and how to create it?](#)
5. [How to create menus?](#)
6. [How & where to place widgets on your website?](#)
7. [How to create posts?](#)
8. [How to add logo and site title/tagline?](#)
9. [How to adjust options & layout?](#)
10. [How to add google map in contact section?](#)

## 1 – How to set up a static front page in WordPress?

In order to create a **Travelia Pro** like front page like shown in the theme demos for [Travelia Pro](#),

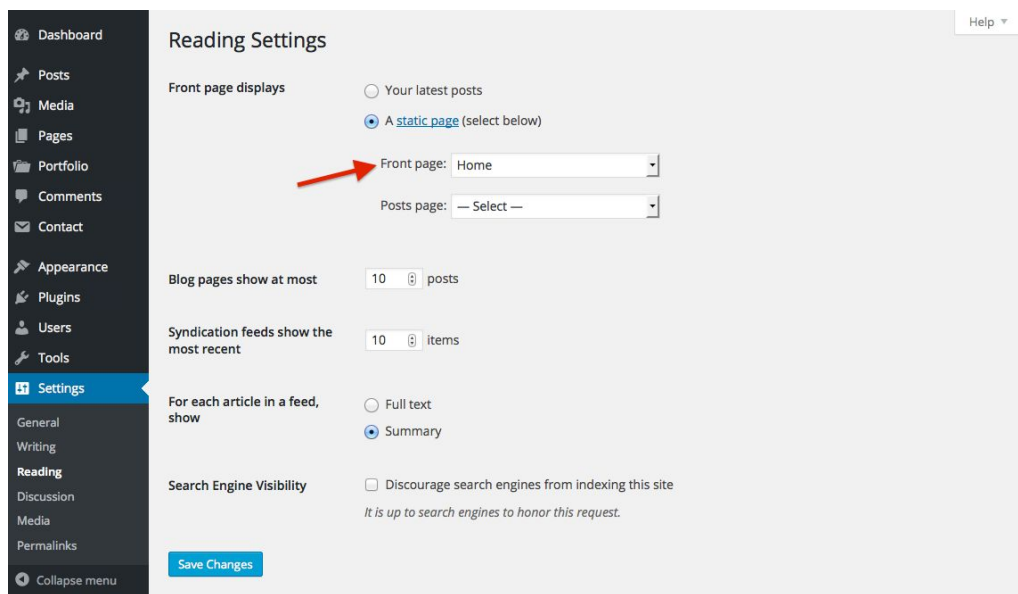

- First to create new page named Home(or else) .
- Select Homepage template for your just newly created page under Page Attributes on the right side.
- Finally, publish this page.

The screenshot shows the WordPress 'Add New Page' editor. The main content area is empty with the text 'Leave Empty this section'. The right sidebar is open to the 'Page Attributes' section. The 'Template' dropdown menu is expanded, and 'Front Page' is selected. A red arrow points to the 'Publish' button in the top right corner, with the text 'Finally, click publish'. Another red arrow points to the 'Front Page' option in the template dropdown, with the text 'Select front page from dropdown'. The top of the editor shows the title field with the placeholder text 'Enter title here' and a red warning message 'Enter page name for Front Template'. The bottom left shows the word count as 0.

- Second, go to **Settings => Reading** in your WordPress dashboard.
- Select A static page and select your just created new page Home as *Front page*.

**Note:-** Don't forget to save your changes

## 2 – How to upload, install and activate Travelia Pro?

From WordPress Dashboard

- Login to Wordpress admin panel
- Go to > **Appearance > Themes**
- Click in **add New >Upload travelia-pro.zip file > Install Now**
- **Activate the theme**

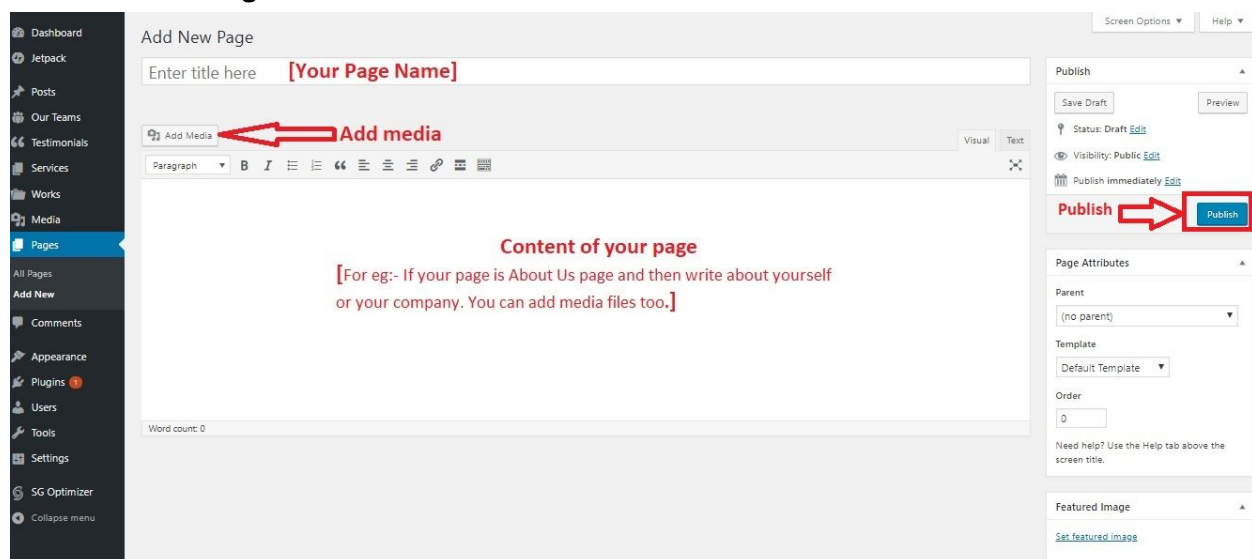

After installing the theme, now you can customize your website as per your preference.

## 3 –What is page and how to create it?

Pages are static and are not listed by date. Pages do not use tags or categories. An about page is the classic example. Pages can be displayed in the sidebar using the Pages widget, and some themes display pages in the navigation at the top of the site.

**-To create page**

- Go to dashboard
- Click in **Pages > Add New > Follow instructions as below**

- After adding all content, you can publish your page and create necessary pages by same method.

## 4 – What is category and how to create it?

Categories provide a helpful way to group related posts together, and to quickly tell readers what a post is about. Categories also make it easier for people to find your content. Categories are similar to, but broader than, tags.

How to create categories

- Go to dashboard
- Click in **Posts > Categories**

The screenshot shows the WordPress dashboard's 'Categories' page. On the left, the 'Add New Category' form has fields for Name, Slug, Parent Category, and Description. The Name field contains '[ Name of your category for eg:-News ]' and the Slug field contains '[ Slug is the name that appears in url ]'. A red arrow points to the 'Add New Category' button with the text 'Click'. Another red arrow points to the 'Slug' field with the text 'You can leave blank if you want your Url same as category name'. On the right, there are two tables showing existing categories. The top table has one item: 'Uncategorized' with a count of 4. The bottom table is empty. A note at the bottom right states: 'Note: Deleting a category does not delete the posts in that category. Instead, posts that were only assigned to the deleted category are set to the category Uncategorized. Categories can be selectively converted to tags using the category to tag converter.'

- You can put your own slug too, most of the time it is left blank which means name of the category itself will be its slug.
- [ For eg. [yoursite.com/category/category\\_name](#)]
- You can put description if you want.
- Now after adding category, your category will appear in right side of the post page.
- You can add more categories in same manner.

## 5 – How to create menus?

This theme comes with three menu locations. **Primary** and **Quick Links** menu.

The screenshot shows the header of the Travelia website. At the top, there is a dark bar with the time 'Mon - Fri: 9:00-19:00' and social media icons for Facebook, LinkedIn, Twitter, and Google+. Below this is the Travelia logo and contact information: '424 Jania Alba United States', 'Hellown Plaza, 350 England', '334 4245-12453', and 'Info@Mywebmail.Com', 'Support@Mywebmail.Com'. The primary menu is located at the bottom of the header, with items: HOME, ABOUT US, TOUR PACKAGE, PAGES, BLOGS, and CONTACT US. A red arrow points to the 'Primary menu' label next to the search bar.

You can create menus in **two ways**.

- **Appearance=>Customize=>Menus=>Create New Menu**
- **Appearance => Menus**(We **RECOMMENDED** this Option for creating menus.)

- Create **New Menu** [You need to create only one menu]
- Give name of the menu[For eg. Primary Menu] > **Create Menu**

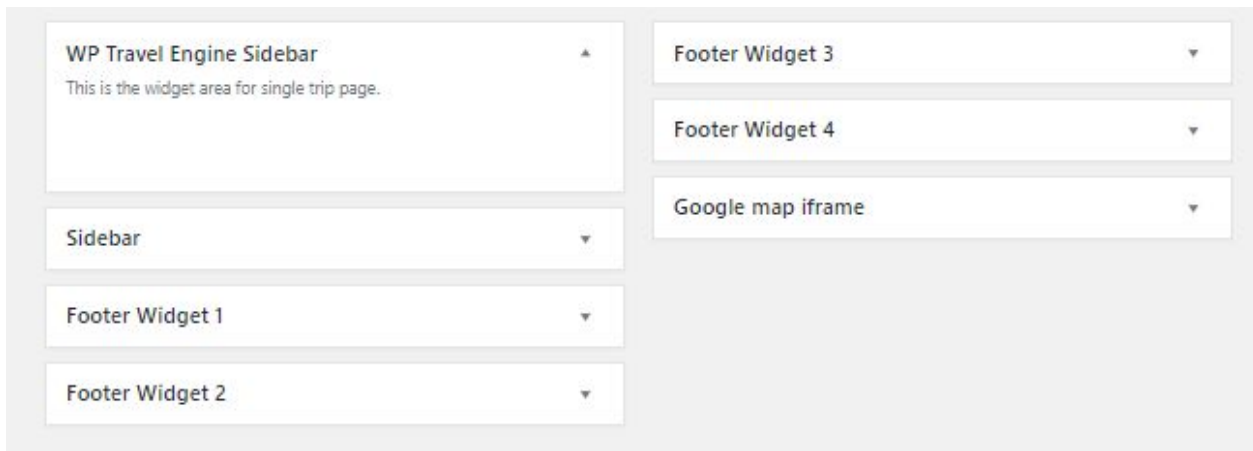

## 6 - How & where to place widgets on your website?

In this important step, we will show you where and how to place widgets. You can place widgets either through two ways:-

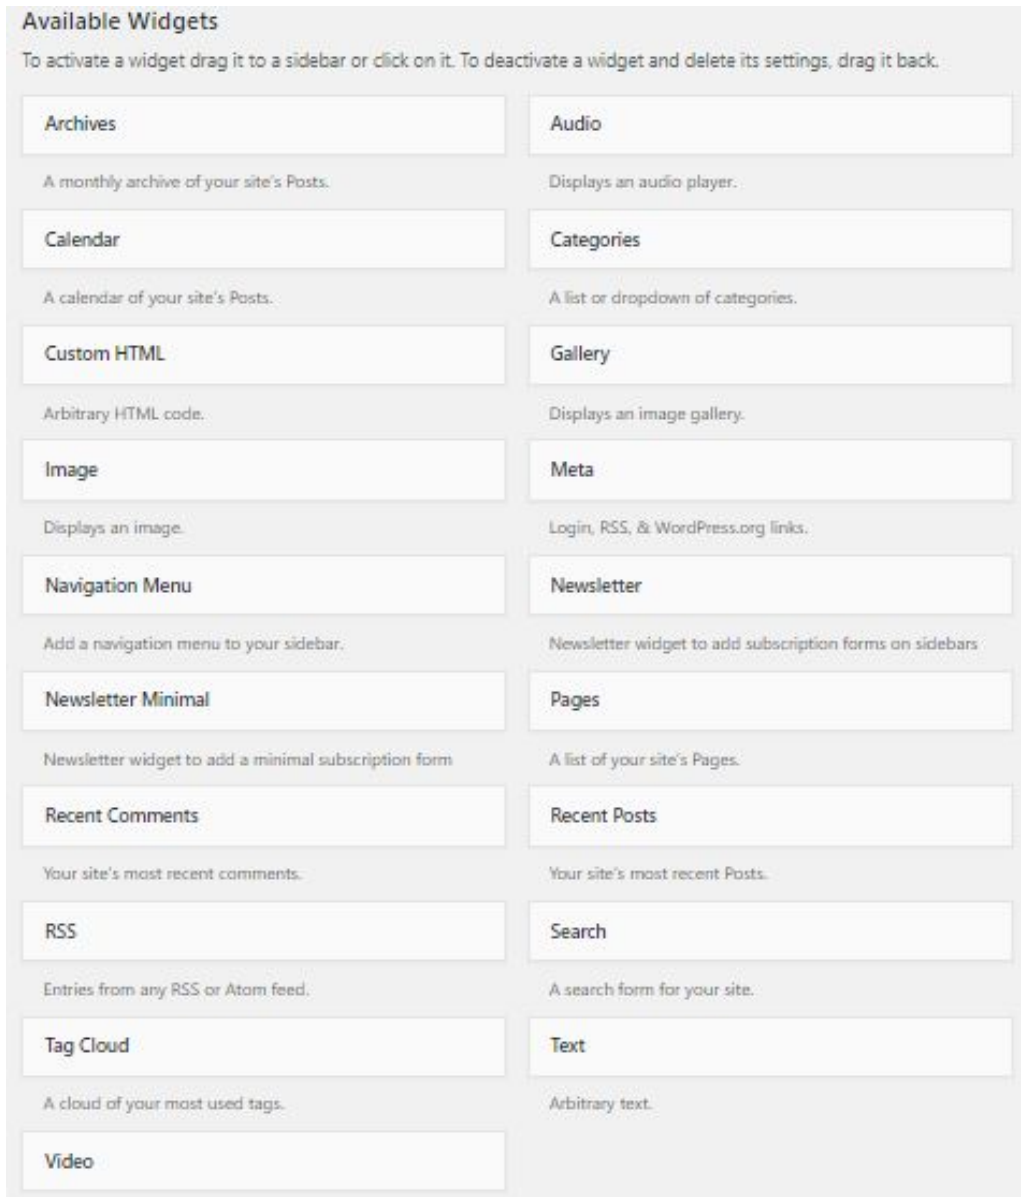

- **Appearance => Widgets**
- **Appearance => Customize => Widgets**

**Note:-** Widgets can be placed simply via drag and drop, so just pull your favored widget to the widget area you like.

**Our registered widgets:-**

Here you can see the **Available widgets** areas of **Travelia Pro** WordPress Theme.

## 7 - How to create posts?

Now after all set, you can start writing your post. Follow these steps

- Go to dashboard > **Posts** > **Add New**

The screenshot shows the WordPress 'Add New Post' interface. The main content area is a large text editor with a red border and the text 'Body of your post goes here' and 'You can add media files from the Add media options'. The right sidebar contains several sections: 'Publish' with buttons for 'Save Draft', 'Preview', and 'Publish'; 'Categories' with a list of categories (Article, Entertainment, News, Uncategorized) and a '+ Add New Category' link; 'Tags' with an input field and an 'Add' button; and 'Featured Image' with a 'Set featured image' link. Red arrows point from text annotations to these elements: 'Choose categories' points to the categories list, 'Include 2/3 tags' points to the tags input field, and 'Upload Featured Image' points to the featured image link.

- Finally, click in publish Button. You can preview your post before actually publish it just make sure everything is ok. If you have not completed writing your post then you can save it as draft.

## 8- How to add logo and site title/tagline?

With **Travelia Pro**, you may customize your logo and site title/tagline in many different ways. To upload a logo and display/hide the site title and tagline, you can navigate to **Appearance => Customize => General Settings => Site Identity** and apply your changes based on your personal requirements.

## 9- How to adjust options & layout?

After you have carefully followed the previous steps, you have successfully completed the basic configuration of the theme. You can now further customize and manage the appearance of your website via the extensive options panel of **Travelia Pro**.

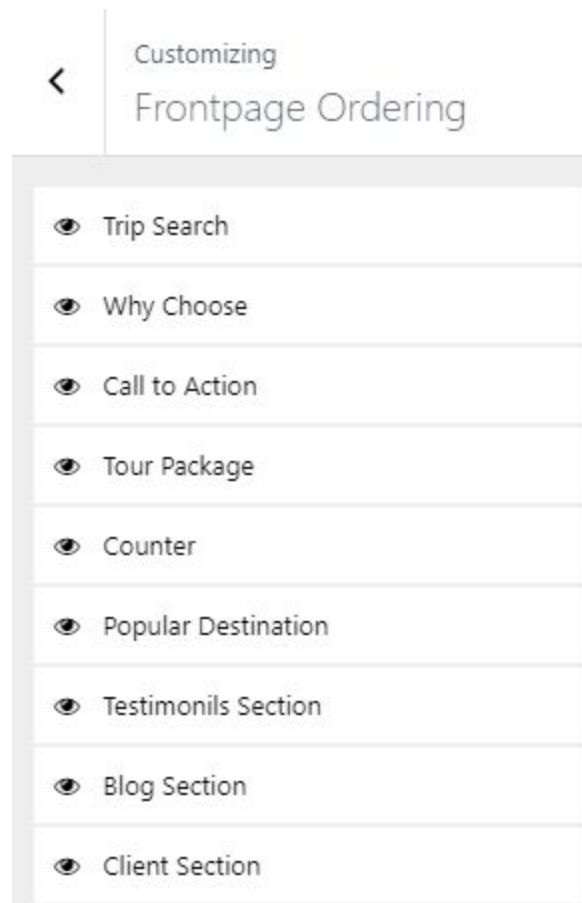

Please navigate to **Appearance => Customize** in your WordPress Dashboard to see the **Frontpage Ordering, General Settings, Header Settings, Blog Settings, Frontpage Settings, Footer Settings, Page Settings** etc panel within the WordPress customizer.

## 9.1 - Frontpage Ordering

To reordering section just by drag and drop customizer section. Follow these steps:-
